

## Comparing Early Warning Across Domains

The Center for Asymmetric Threat Studies (CATS) at the Swedish National Defence College is focused on asymmetric threats in the Information Age. The projects at CATS are mainly sponsored by The Swedish Civil Contingency Agency, The Cabinet Offices and The Swedish Armed Forces.

Within the Intelligence Studies Program CATS has external funding for the years 2011–15. Continued focus lies on the project *Needs for a New Intelligence Methodology* with Dr. Greg Treverton as the principal investigator. The project is supported and sponsored by The Swedish Civil Contingencies Agency and is a part of the continuous research within the intelligence arena with Dr. Wilhelm Agrell from Lund University.
